

Yonder is a documentation solution provider with its roots in the aviation industry, but now serving a wide range of B2B/enterprise customers. With our SaaS product, we help companies stay in control of their content and bring reliable, role-specific information to frontline employees.

With just over 20 employees, your work has a direct impact on the success of the company, so we are looking for team members who love working on a product and live by the mantra of getting stuff done.

To strengthen our development team, we are looking for a

Senior Frontend Developer (80-100%, m/f/d)

As part of the development team for our cloud-based content management solution, you will work with modern technologies in a small and agile team.

If you like to shape a young product in a fast-paced environment, you will feel right at home with us. Despite working in a structured manner, you can handle a grain of chaos that comes along with fast growth.

What we offer

- Flat hierarchies and transparent decision-making
- We value everyone's inputs and ideas, but expect to implement them yourself
- Blame-free error culture inspired by aviation
- Modern offices located in Zurich Oerlikon, just a few minutes by train from downtown Zürich
- Flexible working hours, with possibility to work from home – or anywhere else for that matter
- Bring your own device: You decide what you want to work on, we add 100 CHF to your monthly net salary

Duties and Responsibilities

As a senior frontend developer, we expect you to contribute to and help shape our product. You will of course work closely with the rest of the development team but also expect to interact on a regular basis with the product team. Your experience will help us develop and maintain a stable frontend application which will help our users in their daily work. You will:

- Design, implement, test and ship new features on a regular basis
- Take ownership and drive development of key components of the application
- Continuously improve our frontend applications to keep our software state-of-the-art
- Help address and resolve issues to ensure the best possible customer experience

Qualification Requirements

At least 3-5 years of experience as a frontend developer:

- Previous experience with frontend architecture for complex web-based applications
- In-depth knowledge of React/Redux and JavaScript/TypeScript (or similar frameworks) as well as a strong commandment of basic web technologies such as HTML & CSS, HTTP, REST, JSON
- You have an interest in keeping up to date with recent trends in web technology
- Any experience with (web-based) cross-platform mobile/desktop app development for iOS, Windows and Android is an additional advantage
- Previous experience with SaaS and cloud environments is a nice-to-have
- Self-motivated and able to work independently with little direct supervision
- Excellent abstract thinking and good communication skills
- Fluent in English (German is an advantage)
- Ability to work in our Zurich office on a regular basis

If you are a developer with a passion for building B2B solutions, this is the perfect opportunity for you to be part of a growing young company. Interested? Please contact hr@yonder.info for details.
