

Yonder is a documentation solution provider with its roots in the aviation industry, but now serving a wide range of B2B/enterprise customers. With our SaaS product, we help companies stay in control of their content and bring reliable, role-specific information to frontline employees.

With just over 20 employees, your work has a direct impact on the success of the company, so we are looking for team members who love working on a product and live by the mantra of getting stuff done.

To strengthen our management team, we are looking for a

Chief Technology Officer (100%, m/f/d)

As an experienced engineering manager, you will take an active role in shaping our engineering culture and the future of our SaaS product.

If you like to shape a growing organization in a fast-paced environment, you will feel right at home with us. Despite working in a structured manner, you are comfortable handling uncertainty, ambiguity and chaos that come along with fast growth.

Your Mission

- As a member of the Management Board, you are responsible for the entire software development process
- Build, develop and scale our development team
- Implement best in class processes to drive product quality and development speed
- Drive all refactoring efforts to keep our product maintainable, scalable and performant
- Mentor your team members on technical and staff matters
- Establish and maintain the technology roadmap
- Balance the technology roadmap with the product roadmap, negotiate resources and priorities with product management to ensure we effectively ship value to our customers while continuing to enhance and evolve our technical foundations
- Work cross-functionally with product management to build a category-leading company

About You

- You have prior organizational leadership experience and excellent communication skills
- You have a highly technical background in cloud / SaaS platform development and operations
- You have an in-depth knowledge and good understanding of programming languages, software architecture, system architecture/design, security, and database systems
- You have experience in working with stakeholders to create hiring strategies to build and develop exceptional engineering teams
- Despite being execution-oriented, you never lose the big picture
- Ambitious, self-motivated, and able to work independently
- Willingness to learn many new skills quickly

- Able to endure the occasional tough days and challenges to achieve big success
- Fluent in German and English
- Ability to work in our Zurich office on a regular basis

Why Yonder?

- Flat hierarchies and fast decision-making
- We value everyone's inputs and ideas, but expect to be tasked with implementing them yourself
- Blame-free error culture inspired by aviation
- Modern offices located in Zurich Oerlikon, just a few minutes by train from downtown Zürich
- Flexible working hours, with possibility to work from home – or anywhere else for that matter
- Bring your own device: You decide what you want to work on, we add 100 CHF to your monthly net salary

If you are a person with an interest in going beyond the call of duty and evolving your career as the company grows, this is the perfect opportunity for you.
